Bilateral Meetings

- (09.30 am - 05.30 pm). Please add the "Cooperation Profile" below

Description
An innovative technology startup, Started early 2011, with a young and passionate teams in Web, Mobile and Embedded Systems. We are passionate about creating solutions with available resources, to ease information gathering and processing with the idea of making a perfect solution for every automation sector, specially The agriculture industry.

we decided to help farmers and governments to better manage water consumption, and more generally, agriculture,by building a wireless,highly scalable,automated system that irrigates only when the soil needs water, open/close irrigation system per irrigated sector, commands conditioning : heating systems in green houses,etc
