Description

FARESIN Building S.p.A is a leading company in manufacturing formwork systems and advanced equipment for building industry. The company was founded in Breganze, near Venice, by Mr. Guido Faresin in 1987 with a clear mission: to develop and manufacture equipment for residential, civil and commercial building projects that are capable of cutting time, costs, improving efficiency and productivity. In this way, becoming the ideal partner for your building site and the construction work, supporting the workers with specific training when required and with a reliable after sale service.
