Bilateral Meetings

- (09.30 am - 05.30 pm). Please add the "Cooperation Profile" below

Description

The Hebron Chamber of Commerce & Industry traces its roots back to 1953. Initially formed to foster commerce by paving and improving business avenues, the HCCI has grown over decades and expanded the scope of its business and social projects. Today, the HCCI prides itself on being one of the pioneering bodies, not only in Palestine, but in the Arab region, as well.

The current administrative board has soon pledged and focused its energy towards first helping affiliated members in various industrial and commercial areas, and second contributing to building a Palestinian healthy, robust economy.

HCCI is a collaborative of business and community leaders dedicated to securing and enhancing the economic vitality of the governorate of Hebron. In order to be able to realize its goals, the HCCI would conceptualize creative plans and draft adequate policies. To this end, HCCI established different administrative units and departments that are tasked with building a positive business climate to meet current and future needs and support balanced economic development and growth, as well as actively working to reinforce Hebron governorate (and the Palestinian community at large) as a great place to live and work.

Offer

business services

As a representative of National Task force of the regional program “Empowering Women Economically for Inclusive and Sustainable Industrial Development in the MENA Region”, and as a representative of Chambers of Commerce, the formal sector for businessmen & businesswomen in Palestine, I hope to meet people whom are working with gender issues in general, and others whom are working in developing businesswomen sector in Particular.

In terms of my work as Head of Gender Unit at Hebron Chamber of Commerce and Industry, please be informed that the Federation of Chambers and all chambers of commerce in Palestine are working on transferring women projects from informal sector to formal sector, as well as working on developing their businesses and integrated them to support the national economy. In this regard, I hope to have a recognition glance of Italian, Milan Chamber of

Commerce, experience in this regard.
