About us

We are a farm at 6th of October partly run by renewable energy among 10,000 square meters of green and desert. We believe in the young generation and we want to engage the children to sustain the environment. Our mission is to encourage the community to recycle and plant trees for CO₂ emission reduction.

As an ecological initiative, we organize and host different workshops. We focus on camps and day trips for adults and children from schools, centers and organizations. To gain the interest for a cleaner, healthier and brighter future, our environmental activities contain:

Sessions and workshops on renewable energy, recycling and care for the environment

The Eco-Club: tree plantation, solar energy, green building

Outdoor activities and farm animals

Art and Craft

Are you searching for a place to host your event?
We are the perfect choice for you!
